INTRODUCTION

The Western Earth Surface Processes Team (WESPT) of the U.S. Geological Survey (USGS) conducts geologic mapping, earth-surface processes investigations, and related topical earth science studies in the western United States. This work is focused on areas where modern geologic maps and associated earth-science data are needed to address key societal and environmental issues such as ground-water quality, landslides and other potential geologic hazards, and land-use decisions. Areas of primary emphasis in 2003 included southern California, the San Francisco Bay region, the Mojave Desert, the Colorado Plateau region of northern Arizona, and the Pacific Northwest. The team has its headquarters in Menlo Park, California, and maintains smaller field offices at several other locations in the western United States.

The results of research conducted by the WESPT are released to the public as a variety of databases, maps, text reports, and abstracts, both through the internal publication system of the USGS and in diverse external publications such as scientific journals and books. This report lists publications of the WESPT released in 2003 as well as additional 2000, 2001, and 2002 publications that were not included in the previous lists (USGS Open-File Reports 00-215, 01-198, and 02-269). Most of the publications listed were authored or coauthored by WESPT staff. The list also includes some publications authored by non-USGS cooperators with the WESPT, as well as some authored by USGS staff outside the WESPT in cooperation with WESPT projects.

Several of the publications listed are available on the World Wide Web; for these, URL addresses are provided. Many of these web publications are USGS open-file reports that contain large digital databases of geologic map and related information.

Information on ordering USGS publications can be found on the World Wide Web at <http://www.usgs.gov/pubprod/>, or by calling 1-888-ASK-USGS. The U.S. Geological Survey's web server for geologic information in the western United States is located at <http://geology.wr.usgs.gov/>. More information is available about the WESPT is available on-line at <http://geology.wr.usgs.gov/wgmt>.

ADDITIONAL 2000 PUBLICATION

1. Tolan, T.L., Beeson, M.H., and DuRoss, C.B., 2000, Geologic map and database of the Salem East and Turner 7.5-Minute quadrangles, Marion County, Oregon: A digital database: U.S. Geological Survey Open-file Report 99-351, 13 p., scale 1:24,000, <http://geopubs.wr.usgs.gov/open-file/of00-351>.

ADDITIONAL 2001 PUBLICATIONS

1. Billingsley, G.H., 2001(2004), Important extrusive and intrusive igneous rock units, *in* Young, R.A., and Spamer, E.E., eds., Colorado River Origin and Evolution, Section G; Proceedings of the symposium held at Grand Canyon National Park in June, 2000, Grand Canyon, Arizona: Grand Canyon Association Monograph 12, p. 223-232.
2. Ponce, D.A. and Glen, J.M.G., 2001, Large-scale crustal patterns, epithermal gold deposits, and the Yellowstone hotspot, western U.S. [abs]: Eos, Transactions, American Geophysical Union, v. 82, no. 47 (supplement) , p. F1217.
3. Rowan, E.L., and de Marsily, G., 2001, Infiltration of late Paleozoic evaporative brines in the Reelfoot rift: a possible salt source for Illinois basin formation waters and MVT mineralizing fluids: Petroleum Geoscience, v. 7, no. 3, p. 269-279.
4. Rowan, E.L., Anna, L.O., Lillis, P.G., Cordon, S.M., Hester, T.C., and Ridgley, J.L., 2001, Rates of methane migration by diffusion: Implications for the age of gas resources in north-central Montana [abs.]: American Association of Petroleum Geologists, Annual Meeting Expanded Abstracts, v. 2001, p. 174.
5. Rowan, E.L., Goldhaber, M.B., and Hatch, J.R., 2001, Regional fluid flow as a factor in the thermal history of the Illinois Basin: Constraints from fluid inclusions and the maturity of Pennsylvania coals: American Association of Petroleum Geologists Bulletin, v. 86, no. 2, p. 257-277.

ADDITIONAL 2002 PUBLICATIONS

1. Chuang, F.C., Jachens, R.C., Wentworth, C.M., and Sanger, E.A., 2002, Young strike-slip basin on the Calaveras fault in San Felipe Valley, CA [abs.]: Geological Society of America Abstracts with Programs, v. 34, no. 5, p. 99.
2. Hereford, R., 2002, Valley-fill alluvium during the Little Ice Age (ca. A.D. 1400-1880) Paria River basin and southern Colorado Plateau, United States: Geological Society of America Bulletin, v. 114, no. 12, p. 1550-1563.
3. Hereford, R., and Webb, R.H., 2002, Precipitation history of the Colorado Plateau Region, 1900-2000: U.S. Geological Survey Fact Sheet 119-02, 4 p.
4.
